

XRY REFRESHER TRAINING

WHEN DID YOU TAKE YOUR LAST XRY CERTIFICATION TRAINING?

XRY has been a commercially available mobile forensics tool since 2003. If you were trained on XRY before v5.0 (April 2010), it means there've been two completely new versions of XRY software released since your last certification.

Versions 5 and 6 both brought about significant changes in the functionality and features of XRY and its capabilities to recover more data from mobile devices. Therefore we're now offering a one day refresher training course to get you back up to speed and ensure your existing XRY certification remains valid.

If you want to continue to demonstrate your competency in XRY as a professional mobile device examiner and be able to competently explain how this tool works in legal proceedings, then this course is for you.

Course Description

This Refresher Training will summarize the very latest version of XRY and its full functionality compacted into a one day course for experienced practitioners.

The training includes everything new you will need to know within the XRY System in both the Logical and Physical extraction tools, such as:

- Security codes
- Watch lists
- Smartphone Apps data
- Geo-Location and GPS data
- Specialized exporting
- Backup file importing
- Handy hints and tips

The training will present what is now possible in v6 compared to older versions of the software and will show

COURSE OUTLINE

DAY 1

- >> **XRY release news**
- >> **Logical / Physical Extractions**
 - Mobile phones
 - GPS devices
 - Backup file importing
- >> **Security code recovery**
- >> **Analyse of extracted data**
