(NGM: MSAB B)

Micro Systemation receives order from east Asia worth approximately 1.5 MSEK

Micro Systemation's commitment to the Asia-Pacific (APAC) area is showing some results.

During the last year Micro Systemation began an enterprise in the APAC-region and as a result of MSAB's increased focus and marketing campaigns, we can today announce that we have received a strategically important order from the region, worth approximately 1.5 MSEK.

"In the past MSAB has achieved some smaller sales in this region however this is the largest sale to date. It is very rewarding for us to see such potential in a, for us, relatively new market." says CEO Joel Bollö.

The number of licenses that have been ordered will not be announced due to competitive reasons.

The mobile phone is the modern day digital fingerprint and mobile forensics often plays a decisive evidential role in investigations.

Micro Systemation's sole focus is a quality forensic solution that creates secure and trusted results for end users. Micro Systemation, the global leader of forensic technology for mobile device examination, has offices in Europe and in the US as well as a network of distributors across the globe.

The .XRY software has been used by investigators to quickly and effectively retrieve information, such as pictures, SMS, call history, contact lists and more, since 2003. It has become the de-facto standard within mobile forensic and is today in use in over 50 countries. Combined with our XACT software, which recovers even deleted information, Micro Systemation provides a complete forensic solution for electronic mobile devices.

Micro Systemation is noted on the NGM stock exchange since 1999.
