

MSAB Field – ideally suited for mobile units in demanding conditions

The MSAB Field is our platform solution for outside operations. This rugged equipment is designed for mobile units of military intelligence, law enforcement and international organizations, such as United Nations Peacekeepers.

When users require portable digital forensic kits, which give instant viewable results in the field, the MSAB Field is the perfect solution. Versatile, extremely tough and ultra-portable, it's supplied as a complete package in a shock resistant case meeting high standards of protection.

+ RUGGEDIZED COMPUTER

+ SUNLIGHT VIEWABLE DISPLAY

+ IDEAL FOR CELLEX

RUGGED XRY FOR ALL ENVIRONMENTS

The MSAB Field is a flexible platform which is quick and easy to use and export data in different formats for Triage, Analysis and operational decision making. The MSAB Field incorporates all of these features to allow users to perform a complete and rapid extraction in one black box solution. You can enjoy the security of working with a tool in which all the components work together effectively, significantly minimizing transportation and support issues.

MSAB has developed this shock resistant and weather-proof all-in-one version of its mobile forensic system in response to global demand. The CF20 computer is a powerful, yet portable, Toughbook featuring an LCD screen that transforms from a high performance notebook to a fully detachable tablet PC. This MIL-STD 810G PC is reliable, durable and balanced, weighing 1.8kg (3.9lbs). The optimized display with low reflection technology allows for visibility even in direct sunlight environments.

SPECIALIST HARDWARE FOR ALL WEATHERS

The detachable laptop has a removable keyboard, giving users the best of both laptop and tablet worlds. When users do not need a keyboard, they can simply remove the keyboard and instead carry around the tablet, saving a significant amount of weight and bulk. It even has a special setting that allows for use with gloves.

This all-in-one unit is supplied with the latest version of XRY software, fully installed and configured, along with all the necessary cables and components to conduct an examination in the field. The device runs on the Windows Operating System and is supplied open platform. This allows users to install and configure analysis software such as XAMN Spotlight onto the device alongside XRY as their needs dictate.

PRODUCT HIGHLIGHTS

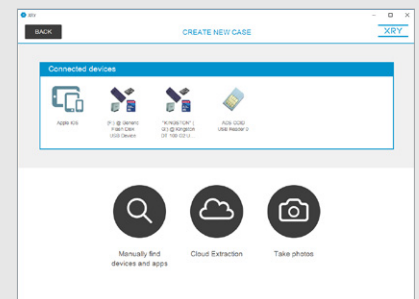

- » Specialist Rugged Hardware Solution
- » Device Manual for All Supported Devices
- » Easy & Rapid Data Extraction
- » Immediate Reporting in the Field

FUNCTIONS

- » SIM Card Reading and Cloning
- » Mobile Device Logical and Physical Examinations
- » Security Code Detection and Bypass
- » Selective Triage Extraction of Data

TOOLS

- » CD/DVD/Blue-ray Burning Wizard
- » Clone SIM Cards
- » Clean Registry
- » License Updates
- » Download Update

INCLUDED IN THE FIELD VERSION PACKAGE

- » XRY Application Software and License
- » Shock Resistant Case with Cable Organizer
- » Rugged Convertible Notebook with 10.1-inch Sunlight Readable Screen
- » Standard 3 Year Hardware Warranty
- » XRY Mobile Phone Cable Kit
- » XAMN Viewer Application
