

## MSAB Kiosk - the power of XRY combined with simplicity of use

There are now more mobile devices in the world than people. When it comes to criminal investigations, mobiles have become one of the most important pieces of evidence for investigators to prove communications, associations and locations.

Such is the demand for analysis from law enforcement, new tools are required to allow investigators to recover mobile information quicker than ever. The Kiosk from MSAB offers the ability to quickly and easily recover data, for users who require fast extractions in a controlled environment.

+ EASE OF USE

+ SPEED OF EXTRACTION

+ MANAGEMENT CONTROL

## TURNKEY SOLUTION

The MSAB Kiosk is a forensic tool designed for front line personnel where mobile data recovery is just one part of their responsibilities. With the Kiosk, you can extract the data within minutes and see the results on screen immediately.

The Kiosk is a turnkey solution for mobile forensics providing full control for managers. With a touch screen interface, it makes mobile device extractions easier than ever before.

## EXTRACT AND VIEW

Users perform extractions in a step-by-step wizard that ensures they comply with operational procedures. Extracted data can be explored in the Viewer application rapidly for initial assessment. Through a powerful search function specific selections of the extracted data can be displayed. MSAB's products are built upon a common base, the .xry file format. This holds evidence securely throughout the investigative process – from the initial acquisition, through analysis, to the final collection of evidence.

## USER ADMINISTRATION

All user activities are logged and can be viewed and exported. This way all activities are traceable and the extraction process is transparent. User management offers total control of tasks being performed in the Kiosk.

## DESIGNED FOR MULTIPLE USERS

The Kiosk provides first responders with the real-time evidence and intelligence capabilities needed to confirm or reject initial suspicions. Whilst complex devices or investigations can be processed by forensically experienced staff, the MSAB Kiosk empowers your organization to examine mobile devices faster and reduce backlogs.

The Kiosk can be tailored to organization workflows and configured for different levels of forensic ability. This gives managers control of users within a simplified forensic process, without challenging the integrity and credibility of the forensic evidence.

## SETTING UP A CUSTOMIZED WORKFLOW

With the creation of workflow sequences, a user can be guided through a tailored extraction process. This simplifies and secures the process of device extraction and examination. A typical workflow sequence can include help screens to guide the user in the extraction process in accordance with local policies and procedures. Case and exhibit data fields can be fully customized to suit your processes and internal audit trail to include for example, data input validation, mandatory fields, etc.

## XEC SYSTEM ADMINISTRATION

The Kiosk is configured to work with XEC Director which offers a full suite of system administration tools. This allows for management of multiple Kiosk units deployed within an organization. The MSAB Kiosk and XEC Director combined, provide the optimal solution for an organization that needs to roll out mobile forensics to a wider area.

## PRODUCT HIGHLIGHTS

- » Workflow Guided Extraction Wizard
- » 19.5" Touch Screen
- » Viewer for Review of Extracted Data
- » LED In-Use Indicator
- » File Export to Disc or Drive

## FEATURES

- » Dedicated Turnkey Terminal Solution
- » Unique Help File for Every Device
- » Easy Touch Screen Data Extraction
- » Immediate Reporting
- » User Control and Administration

## TOOLS

- » CD/DVD Burning Wizard
- » Clone SIM Cards
- » Clean Registry

## SPECIFICATIONS

- » Weight: 9.05 kg
- » Size: H 430 mm x W 480 mm x D 210 mm
- » LCD Touch Screen: 19.5" HD LCD Widescreen
- » Hybrid Hard Drive: 500 GB

## INCLUDED IN THE KIOSK PACKAGE

- » Touch Screen Kiosk
- » XRY Cable Kit and Organizer
- » SIM Card Reader
- » Integrated Write Protected Memory Card Reader
