

XRY RELEASE NOTES v7.1

XRY JUST GOT BETTER

- » SUPPORT FOR iOS 10
- » SUPPORT FOR POKÉMON GO
- » ANDROID BACKUP EXTRACTION OF BLOCKED APPS
- » 943 NEW DEVICE PROFILES

19,544
FORENSIC PROFILES
WITH **1,220** APPS!

SUPPORT FOR iOS 10

The impending release of iOS 10 for Apple devices will introduce significant changes to the operating system backup format. This means that every extraction tool on the market will need to be updated in order to support iOS 10 extraction.

Fortunately, we are already there so you can stay ahead of the official iOS 10 release expected in September. XRY 7.1 supports the new iTunes backup format, including encrypted backups.

NEW FEATURES

- » Support for iOS 10
- » iOS 10 iTunes backup decoding
- » Support for Pokémon GO
- » Decoding of Outlook Data Files (.pst)
- » Android backup extraction of blocked apps
- » Support for new cloud services:
 - » Microsoft OneDrive
 - » Google Takeouts, including Location and Search History
 - » Box
- » Video recording support for XRY Camera
- » XRY file property customization
- » User interface customization
- » Default file name and path customization

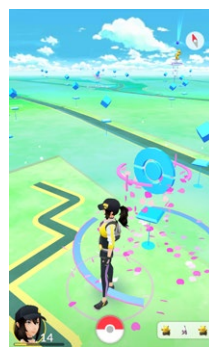

IMPROVEMENTS

- » Improved automatic ID of portable media devices
- » Increased support for Nokias with Infineon chipset
- » Increased support for MediaTek Security Codes
- » Improved app category translation
- » Improved split file import

943 NEW DEVICE PROFILES AND 103 APPS

XRY 7.1 includes 943 new device profiles and 103 new app versions to make sure you stay ahead. In this release you will find support for the popular Samsung Galaxy S7 and Huawei Mate 8 to name but a few of the supported devices.

MSAB prides itself on focusing on supporting devices regularly encountered by Law Enforcement, Military, and Government customers. You can be sure we offer the fastest phone extraction and report opening times available.

SUPPORT FOR POKÉMON GO

The much desired extraction tool for Pokémon GO is here as XRY 7.1 brings you support for the viral game, Android versions 0.29.0, 0.29.2, 0.29.3, 0.31.0 and iOS version 0.31.1.

On Android version 0.31.0 and iOS version 0.31.1 you can extract the game account registered email address. Up until Android version 0.29.3 Pokémon GO also stored session times and game event GPS data, which you can extract with XRY 7.1.

MOBILE FORENSIC PROFILES	v7.1	TOTAL
Logical Extraction	257	6,637
Physical Dumping	201	4,158
Physical Decoding	199	4,095
Passcode & Bypass	114	2,108
App Versions	103	1,220
XRY Untested	69	1,326
TOTAL	943	19,544

IMPORTANT NOTE ABOUT XRY 7.1

In this release the default setup installation will open XRY files in XRY Reader. If you prefer to use our new XAMN Beta software (Viewer/Spotlight), please download the latest XAMN v1.1.1 software update. This is needed to analyze the latest extraction files from XRY v7.1 which introduce many improvements to our XRY core technology. Download the latest files from the Customer Portal, available at <https://customer.msab.com>

USER INTERFACE CUSTOMIZATION

Now you can customize and edit file properties directly from the XRY case overview page. Editable properties include

- » Operator name
- » Exhibit ID
- » Custom file properties for cases and files

File and case properties are changed by clicking Edit Case/Exhibit Data in the drop-down list on the case overview page. In addition, file settings now allow users to make custom rules for the default file name and path.

OUTLOOK DATA FILE DECODING

Outlook Data Files (.pst) are used to store email messages and other Outlook items locally on a computer.

With this release you can import Outlook Data Files (.pst) into XRY to decode email messages, and include them in your case files for examination.

ANDROID BACKUP EXTRACTION OF BLOCKED APPS

XRY 7.1 introduces a new solution for logical extraction of Android app versions that previously had backup extractions blocked by the app developer.

The solution re-enables backup extraction of many popular apps, including WhatsApp, Facebook Messenger, Kik Messenger, QQ and WeChat.

For a list of all apps with re-enabled backup extraction, see later in this release note.

AUTOMATIC IDENTIFICATION OF PORTABLE MEDIA DEVICES

When connecting to a USB port, the sheer volume of available electronic devices means that many of them are identified as generic portable media devices.

With this release XRY automatically identifies more than 100 new devices. New automatically identified devices include

- » Windows Phone 7 devices
- » Windows Phone 8 devices
- » Multimedia devices
- » GPS devices

Automatic identification of devices helps you identify and recover data faster.

RECORD VIDEO WITH XRY CAMERA

XRY Camera is the perfect tool to capture screenshots and details of mobile devices to complement your data extractions.

This release also lets you record videos and embed them into your XRY case files. Now you have the added possibility to document and secure motion screen events on mobile devices.

MEDIATEK

MEDIATEK SECURITY CODE EXTRACTION

XRY has the best MediaTek chipset support in the market and with this release we have made it even greater. Support for logical security code extraction of MediaTek devices include

- » MT6261 chipset
- » MT6261D chipset

INCREASED SUPPORT FOR NOKIA INFINEON DEVICES

Many common disposable prepaid phones use the Infineon chipset and this release adds support for physical extraction of many popular Nokia Infineon devices.

The list of supported Infineon chipset devices includes

- » Nokia 109
- » Nokia 111.1
- » Nokia 112
- » Nokia 113
- » Nokia 515
- » Nokia Asha 301

SUPPORT FOR NEW CLOUD SERVICES

XRY Cloud is the solution for extracting content from beyond the mobile device. With every new release of XRY we aim to add new and better functionality to give you the best possible forensic tool for Cloud based services.

In this release you will find added support for

- » Microsoft OneDrive
- » Box cloud service
- » Google Takeouts

Google Takeouts includes Location History and Search History.
