

XRY Introduction

Course Overview:

The XRY Introduction course is ideal for those who want to get up and running quickly with XRY without taking the full 3-day XRY Certification course. This course is designed to provide a brief overview of XRY and how to quickly get started extracting mobile devices.

This course also offers analysts and investigators who are using XAMN products the opportunity to understand and appreciate how the data they are analyzing with XAMN Spotlight, Horizon, and Elements is obtained.

This course is the first along the path to becoming an MSAB Certified Analyst (MCA) and an MSAB Certified Advanced Analyst (MCAA).

Key course takeaways:

- Learn by doing using highly interactive content
- Experience content taken from the full XRY Certification course
- Navigate all menus and functions within XRY to get a full understanding of the product
- Learn how to tailor the software to your organization
- Identify the tools that come with the XRY kit
- Create Case files and add exhibit data
- Perform mobile device extractions through simulated exercises
- Analyze extractions with a glimpse of XAMN Spotlight, MSAB's powerful analytic toolprosecutors

Delivery Method

- OnDemand Online

Course length

1 hour

Pre-Requisites

None

Learning Pathways:

Obtaining Certification is the only way to ensure full awareness and understanding of all the features and complexities of the different products offered by MSAB. MSAB offers two training pathways; the Examiner pathway and the Analyst pathway.

Each pathway provides users with unique certifications along the way, culminating in a final achievement of obtaining the designation of MSAB Certified Forensic Professional.
