

The MSAB Training Academy: XRY Express

Quick Mobile Data Extraction for Frontline Users

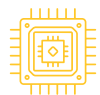

Join us to learn how XRY Express simplifies mobile data extractions for operational teams. This portable solution delivers the proven power of XRY mobile forensic tools through a straightforward, guided workflow designed for frontline users. Whether you're working in law enforcement, border security, or corporate investigations, XRY Express empowers users to confidently extract and recover data—even if digital forensics isn't their primary role.

Why Attend and What You'll Learn:

This course is designed to help your team:

Perform consistent, efficient extractions through guided workflows

Extract data from mobile devices quickly and accurately with minimal training

Understand and apply your organization's workflows for compliance and consistency

Reduce backlogs and free up forensic specialists to focus on complex cases

Maintain data integrity and compliance with ISO 17025 and 27037:2012 standards through audit logging and secure processes

Whether you're extracting data in the field or supporting a larger forensic operation, XRY Express ensures your team can contribute effectively and confidently.

The MSAB Training Academy: XRY Express

Elevate Your Digital Forensics Skills

XRY Express is MSAB's simplified, portable solution designed to empower frontline users to perform mobile data extractions efficiently and consistently. This training equips operational personnel—such as patrol officers, investigators, and border agents—to handle extractions with minimal training, using a guided, touch-based or mouse-controlled workflow tailored to your organization's policies.

Course Highlights:

- Learn to perform extractions using the XRY Express interface
- Follow customized workflows aligned to your agency's standards
- Extract data from mobile phones, SIM cards, and memory cards
- Maintain audit trails and chain of custody automatically
- Understand how XRY Express supports broader forensic operations

Why Attend?:

This course helps agencies:

- Decentralize forensic operations and reduce case backlogs
- Empower non-experts to handle routine extractions
- Ensure consistency and compliance with ISO 17025 and 27037:2012
- Improve efficiency across departments handling mobile evidence

Training is adapted to your workflows and includes hands-on practice to ensure your team can use the platform confidently and correctly.

Course Details:

- Format: Instructor-led, in-person or virtual
- Duration: 2 days
- Prerequisites: None
- Certification: Official XRY Express Certification awarded upon completion
